Automate charting and patient documentation with WELL AI Voice

What is WELL AI Voice?

WELL AI Voice is an AI-powered virtual assistant designed and offered by WELL Health.ai to automate and alleviate the administrative burdens of charting and patient documentation tasks, driven solely by voice commands.

1. Streamline Patient Documentation

- Automatically generate encounter notes based on your conversation with patients, directly into your EMR and reduce time spent on manual note taking.

2. Accurate Clinical Decision Support

- Personalized recommendations and treatment options based on latest medical guidelines and research.

3. Safe and Secure

- Commitment to privacy and security with compliance with data protection regulations ensures all patient information remains safe and secure.

Medical Dictation

Ambient Scribe

Medical Search

25 +
years of expertise

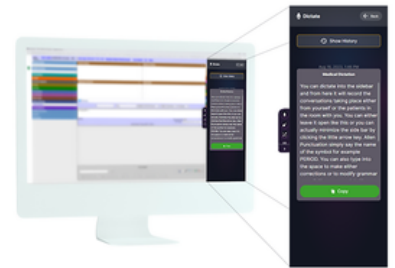

Save up to 2 hours per day in patient documentation.

The Features

Medical Dictation

WELL AI Voice's Medical Dictation enables you to dictate notes directly into your EHR with industry-leading accuracy rates. With a simple click of a button our Natural Language Processing (NLP) algorithms, medical language models, and medical speech recognition solutions let you dictate notes up to three times faster than typing.

Medical Search

Quickly get answers to questions related to drug dosage, treatment plans and more from the most recent medical research and medication monographs. Sourced from trustworthy, evidence-based sources such as Merck Manuals, ChoosingWisely and OpenFDA, you can streamline your research into focused questions and save administrative time.

Ambient Scribe

Focus on the conversation with your patients while WELL AI Voice Ambient Scribe generates a SOAP note. Ambient Scribe listens to your encounter and using NLP creates accurate documentation right at the point of care, enabling you to stay connected to your patient throughout their visit.
